

# How to fix domain settings (Name server) on Squarespace

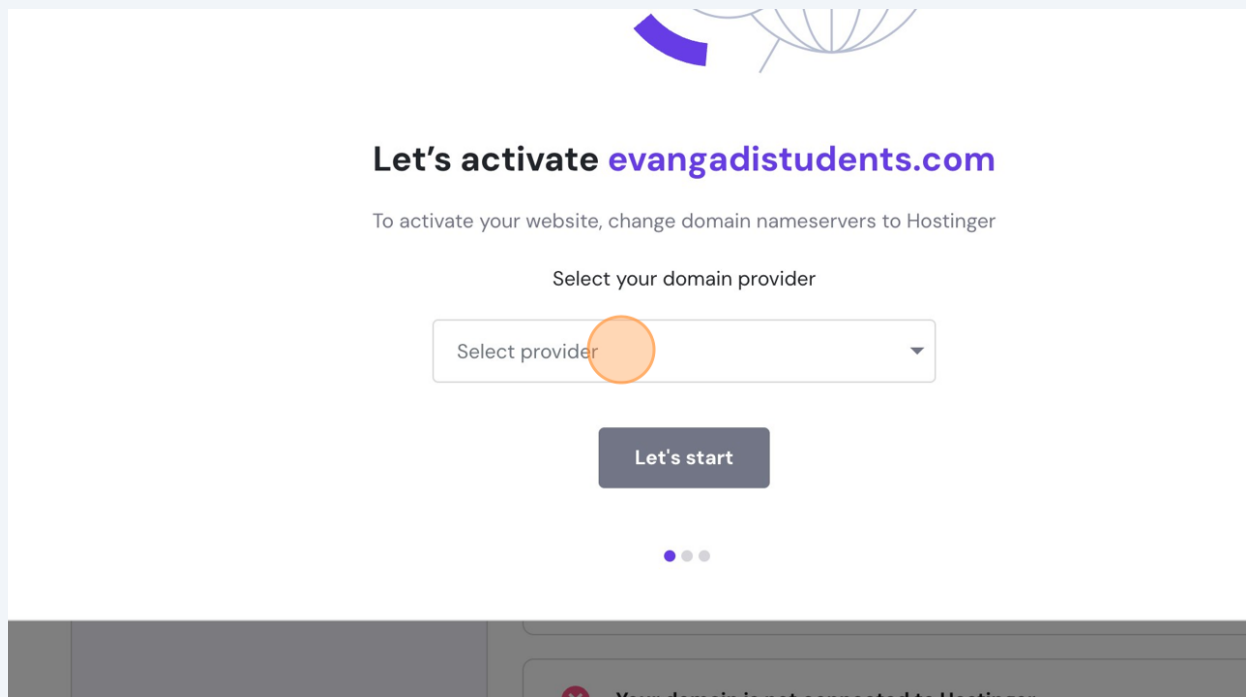

1

On [Hostinger.com](https://hostinger.com) cPanel > Click "How to fix this?"

2 Click here.

Let's activate **evangadistudents.com**

To activate your website, change domain nameservers to Hostinger

Select your domain provider

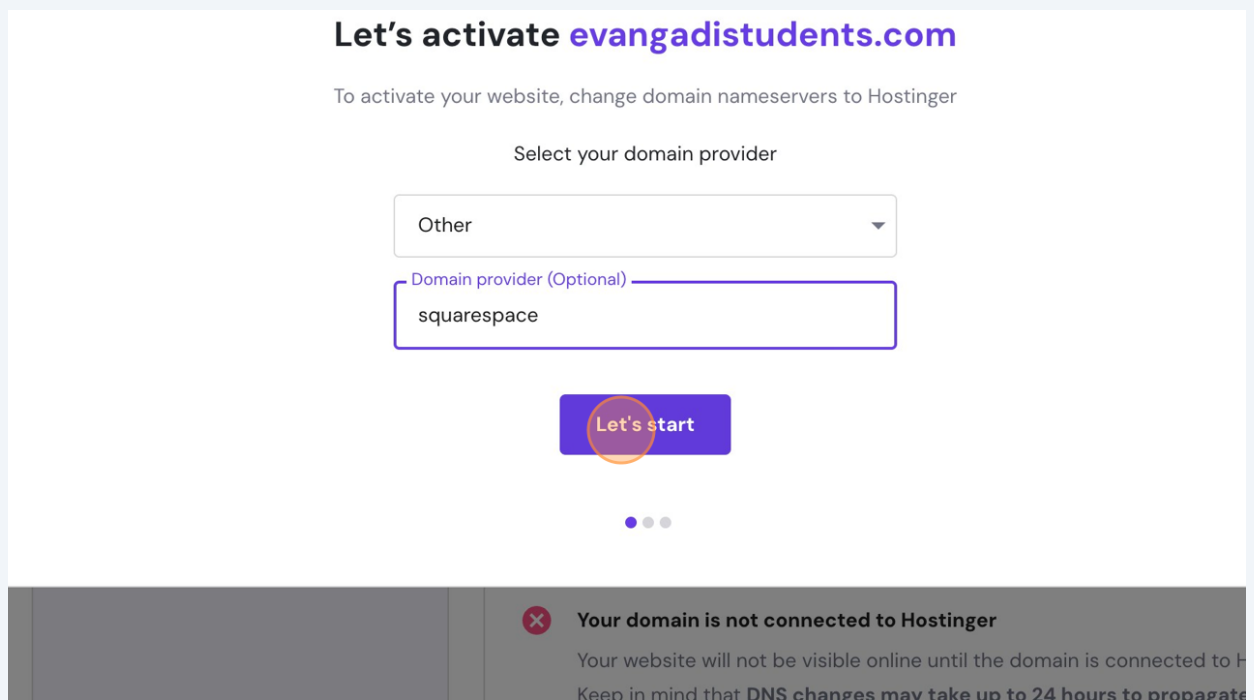

Select provider

Let's start

● ● ●

✖ Your domain is not connected to Hostinger

3 Click "Other" from the dropdown menu, Type "squarespace" and Click "Let's start"

Let's activate **evangadistudents.com**

To activate your website, change domain nameservers to Hostinger

Select your domain provider

Other

Domain provider (Optional)

squarespace

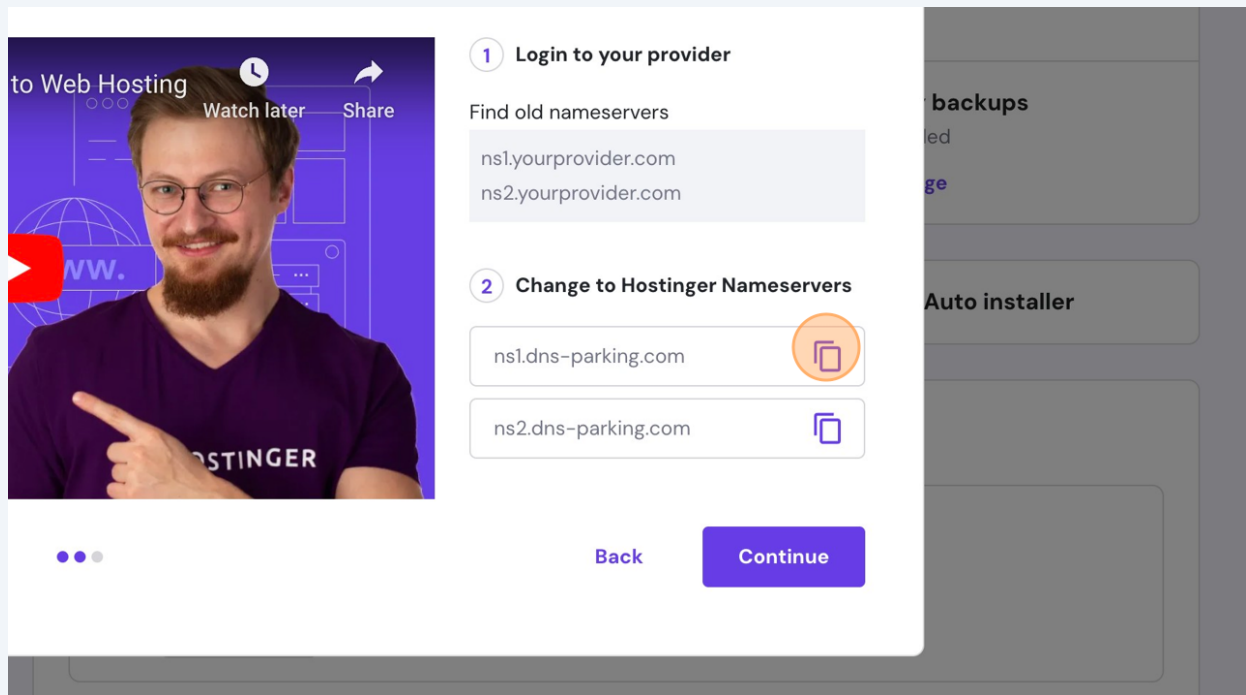

Let's start

● ● ●

✖ Your domain is not connected to Hostinger

Your website will not be visible online until the domain is connected to Hostinger. Keep in mind that DNS changes may take up to 24 hours to propagate

#### 4 Copy both Nameservers

to Web Hosting Watch later Share

**1 Login to your provider**

Find old nameservers

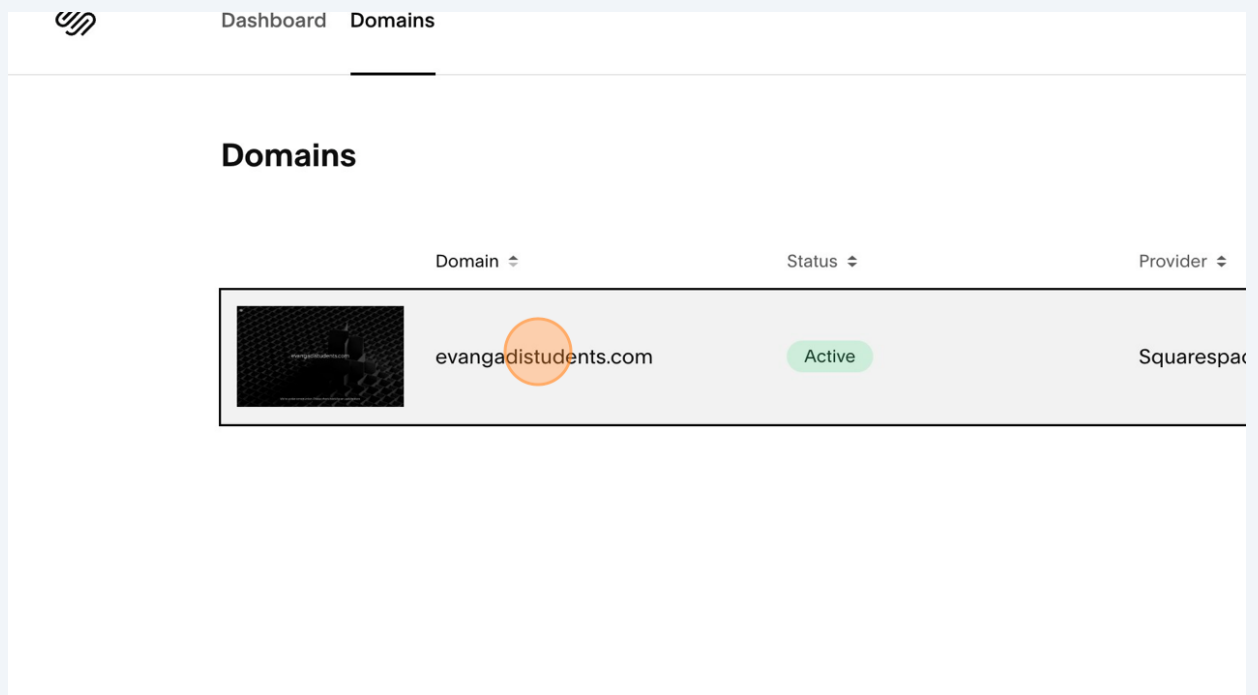

ns1.yourprovider.com  
ns2.yourprovider.com

**2 Change to Hostinger Nameservers**

ns1.dns-parking.com  
ns2.dns-parking.com

Back Continue

#### 5 Go to squarespace domain settings
